

Psychopathology

PSYCHOPATHOLOGY

BABIES "KNOW"

- 1 creating family
- 2 omnipotence
- 3 the world revolves around me

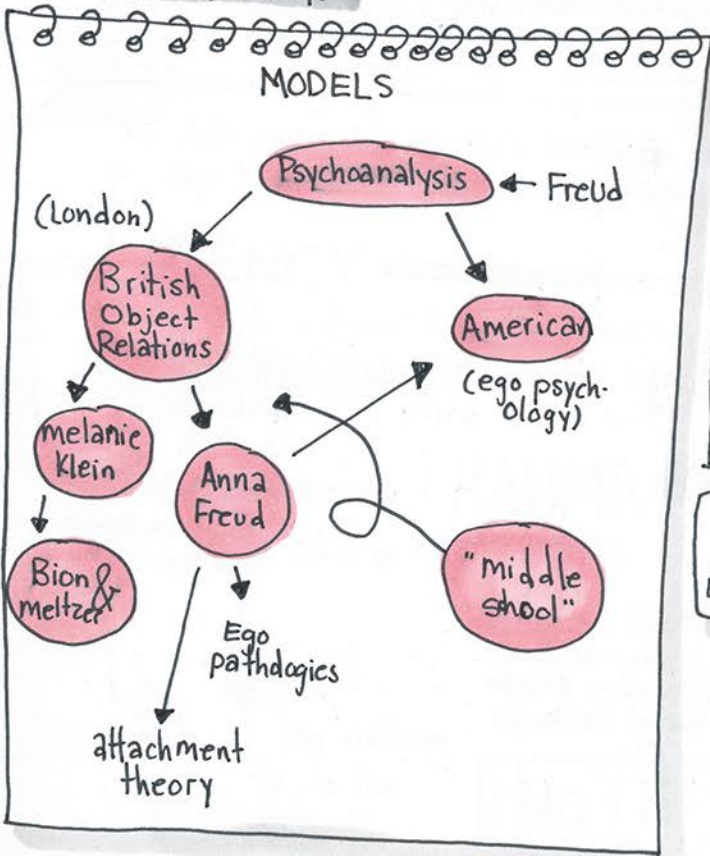

How do we extend beyond the symptoms to understanding character structures

NONPATHOLOGICAL beliefs in normal & healthy development

NOT getting this emotionally vital developmental experience creates defenses and **PATHOLOGY**

What does an infant need to DO in order to survive?

ATTACHMENT THEORY

rooted in P.A. but operates in a different "field"

DR DAY: knowing attachment styles DIDN'T HELP PATIENTS

Attachment Theory doesn't help locate personality structures.

INTERPERSONAL remedy for INTERPSYCHIC problem

constant eye contact is **VIOLENT**

client's RAW EMOTION → T's Counter-transference registered

describe the felt experience for them

ATTACHMENT THEORY

gives insight to interpersonal development, not personality development.
